Group Ticker Plant (GTP) – Next Functional Release 1.4.6.6

The purpose of this Service Announcement is to inform customers that the Group Ticker Plant (GTP) Customer Development Service (CDS) will be upgraded to the next functional release, 1.4.6.6, on **Monday 13 September 2021**. CDS will be down on that day and normal service is expected to return on Tuesday 14 September 2021.

Production go-live is currently scheduled for Monday 18 October 2021, which will be confirmed via a Service Announcement.

GTP release 1.4.6.6 will introduce:

- A new 'Analytics' Service Line which is intended to provide additional statistics related to order book activity on LSE, Turquoise and Turquoise Europe markets. This service publishes a snapshot of statistics every 1 second for each instrument available on the LSE, Turquoise and Turquoise Europe. A new Message Type (0x61 – Analytics) has been introduced due to this new Service.

  The Analytics Service is a value-added service and will be provisioned to clients subject to correct commercial arrangements being in place. Please contact the LSEG Market Data team (marketdata@lseg.com) for further information about data licencing.

- Auction Imbalance fields ('Imbalance Quantity', 'Imbalance Direction' and 'Auction Info') which currently exist in the 'Statistics Update' and 'Statistics Snapshot' Messages will begin to populate in CDS on **Wednesday 18 August 2021** and in production once LSE release 9.6.12 is live in Production, which is expected Monday 18 October 2021. The Auction Imbalance fields will be updated during an auction call period every time the imbalance side or size changes.

There are no requirements to self-certify your GTP software before production go-live if you do not wish to use the Analytics Service.

GTP Documentation has been updated and full details of changes can be found on the GTP Documentation website, under the 'GTP Next Functional Releases' section.
