Group Ticker Plant (GTP) – Next Functional Release 1.4.6.6 – Production Go-Live Update

Following on Service Announcement [001/18082021](#), released on 18 August 2021, this notice is to inform customers that the Group Ticker Plant (GTP) production go-live date, for the next functional release 1.4.6.6, is now scheduled for **Monday 1 November 2021**, and no longer for Monday 18 October 2021 as previously announced.

As a reminder, GTP release 1.4.6.6 will introduce:

- A new 'Analytics' Service Line which is intended to provide additional statistics related to order book activity on LSE, Turquoise and Turquoise Europe markets. This service publishes a snapshot of statistics every 1 second for each instrument available on the LSE, Turquoise and Turquoise Europe. A new Message Type (0x61 – Analytics) has been introduced for this new Service.

The Analytics Service is a value-added service and will be provisioned to clients subject to correct commercial arrangements being in place. Please contact the LSEG Market Data team (marketdata@lseg.com) for further information about data licencing.

- Auction Imbalance fields ('Imbalance Quantity', 'Imbalance Direction' and 'Auction Info') which currently exist in the 'Statistics Update' and 'Statistics Snapshot' Messages. The Auction Imbalance fields will be updated during an auction call period every time the imbalance side or size changes.

There are no requirements to self-certify your GTP software before production go-live if you do not wish to use the Analytics Service.

GTP Documentation has been updated and full details of changes can be found on the GTP Documentation [website](#), under the 'GTP Next Functional Releases' section.
