## TRADEcho Customer Development Service Upgrade 3.6 Release Update – Monday 24 August 2020

Further to the Service Announcement sent on 5 August 2020, [001/05082020](#), this is to inform customers that the TRADEcho Customer Development Service (CDS) will now be upgraded to TRADEcho 3.6 on **Monday 24 August 2020** and not on Wednesday 19 August 2020 as previously announced. Therefore, the TRADEcho CDS environment will now be down on Monday 24 August 2020 instead and customers will not be able to connect.

It is expected that the environment will be available as usual on **Tuesday 25 August 2020**.

TRADEcho release 3.6 includes the following changes:

- Increased the number of entries in the csv file for upload.
- Enhanced logic for UK and EEA ToTV instruments resulting in the default TargetAPA being selected if left blank.
- Re-introduced the Last Market lookup functionality. Customers can now enter a MIC in the Last Market field. SRR will then determine if this is a valid Venue MIC.

For a full list of changes customers can view the updated specifications and release notes via the following link under the section 'TRADEcho – Next Functional Release':

<https://www.londonstockexchange.com/products-and-services/technical-library/millennium-exchange-technical-specifications/millennium-exchange-technical-specifications.htm>

This release contains no mandatory changes and as such, no mandatory certification is required. Customers that do make changes to their software will need to complete a certification test. Customers are advised to test this release before it is introduced in Production. A production go-live is expected late in Q3 and exact dates will be given in a future Service Announcement.
