CurveGlobal Markets

- New field name “Event Type” being added to Options Summary and Future Summary messages.
- Enhancements to Implied-Out functionality (off-tick prices).
 - Finer price granularity for strategy instruments in comparison to outright legs.
 - Initially introduced for Inter-Commodity Spread (ICS) strategies.

MIT Hardware Refresh

- Hardware on which the MIT platform runs (for Borsa Italiana and EuroTLX) will be **replaced**, go live date 21st October 2019
- **No changes to Native and FIX Trading Protocols** will happen together with the Hardware Refresh
- **No changes to Native/FIX gateways IP and ports** will happen together with the Hardware Refresh
- **Matching Engine internal RTT will decrease significantly**
- The Platform failover will change mechanism from hot-hot to **active-passive**
- **FPGA gen3 technology will be introduced for GTP FDI channels for cash markets**
