London Stock Exchange Sustainable Bond Market

London Stock Exchange's dedicated Sustainable Bond Market (SBM) champions innovative issuers in sustainable finance and improves access, flexibility and transparency for investors.

In 2015, we became the first exchange to set up dedicated Green Bond Segments. Now our expanded SBM offers the most comprehensive platform for sustainable debt financing, as the need for investors and companies to manage climate risks and create impact becomes ever more important.

Key benefits

Breadth of offering

London's SBM covers a full suite of asset classes and instrument types, ranging from plain vanilla bonds to more complex instruments such as asset-backed securities. Combined with expertise across LSEG in primary, secondary markets, data and post-trade services, SBM helps deliver the broadest sustainable finance platform to issuers and investors.

World class peer group

Display your bonds alongside high profile international issuances on SBM from supranationals, local governments and municipalities, as well as corporates, many of which are world firsts in terms of currency, geography or structure, including the first certified green bonds out of China, India, the Middle East and first sovereign green bonds from Asia Pacific and the Americas.

International investor base

SBM delivers access to the largest, most sophisticated and long-term oriented investor base for sustainable finance, offering a uniquely deep pool of international liquidity. London Stock Exchange remains committed to active engagement with investors in order to support our markets with innovation and effective policies.

Enhanced visibility and robust standards

Securities admitted to SBM are subject to robust standards, to enhance investor confidence in the level of disclosure related to their sustainability frameworks and reporting. SBM offers issuers the opportunity to display key documents such as external reviews, transition and sustainability frameworks and annual sustainability reports on their dedicated profiles. Commitment to ongoing reporting is required.

Flexibility

SBM offers dedicated segments for green, social, sustainability, issuer-level classified bonds (including both green revenue eligible and sustainability-linked instruments) and transition bonds. Bonds on SBM can be admitted to London Stock Exchange's Main Market and International Securities Market (ISM). We also provide a range of secondary market trading options, so that issuers can offer investors appropriate liquidity and price discovery mechanisms.

Issuer service tools and insights

LSEG provides guidance and support to issuers through variety of channels, including its Issuer Services platform and other Group services. Sustainable bonds can also be traded through MTS, Europe's leading electronic trading platform for public sector debt. FTSE Russell, a leading index and information provider, provides data and indices to investors and issuers, such as FTSE4Good, FTSE TPI Climate Transition, ESG ratings, Carbon Emissions, Climate Risk and Green Revenues. LCH SA, one of the largest global Central Counterparties (CCPs) also supports sustainable bonds through eligibility for clearing and use as collateral.
